

5 THINGS YOU CAN DO

PUBLIC TRANSPORT

Public transport provides an easy way for your club to take advantage of cheaper, more efficient transport. The SU can book train tickets on your behalf. Free bus travel is available for everyone in Scotland under the age of 22.

2

SHARE SU BOOKED TRANSPORT

Is another club travelling to the same destination as you? Could you coach share to split costs and save emissions? Contact eusubook@ed.ac.uk to check if another club is travelling to the same place.

BOOK APPROPRIATELY

Consider the number of people travelling in your group. Book transport that caters for as close to that number as possible if sharing is not an option. If using an Arnold Clark vehicle, consider driving in an ecological manner.

3

4

LIMIT AIR TRAVEL

Travelling by air is undoubtedly the most damaging method of transport when it comes to carbon emissions. Avoid this unless absolutely necessary.

CARBON OFFSETTING

You can offset your carbon emissions from transport to fixtures and events based on the type of vehicle, number of people travelling and distance travelled. This can be done by donation to the Woodland Trust. Contact eusubook@ed.ac.uk for more info.
